TABLE OF CONTENTS

PHS: Primary Health System and the Awakening of the Body..... 1

Pre-Class Story.....	1
The Scientific Nature of Human Design.....	2
The Design and Personality Are Not Alike.....	3
The Transformation of the Form.....	3
The Brain.....	4
Intelligence.....	4
The Primary Health System.....	5
Differentiation.....	6
The Design Sun/Earth: The Brain System.....	6
What Is Determination?.....	7
We're Uranian, not Saturnian.....	8
Neural Shutdown.....	9
Twelve Digestive Ways.....	9
The First Dietary Regimen: Appetite.....	10
Cognitive Potential.....	10
Unique Outer Authority.....	11
A Way of Life.....	11
Setting the Foundation for Your Life.....	12
Variable.....	12
The Nodes: Environment.....	13
Four Steps of Transformation.....	14
Seeing Uniquely.....	14
Communion with the Other.....	15
We're Vulnerable and Afraid.....	16
The Body Is Not Afraid.....	16
Do Without Doing and Everything Gets Done.....	17
Respect the Body.....	17
We Live in a Mad Homogenized World.....	18
Environment and Perspective.....	19

The Crystals of Consciousness Are Dark Matter	19
Passenger Consciousness.....	20
The Personality is an Alien	20
The Mind Has Its Place	21
The Form Principle Is Entertainment	21
Our Magical Lives.....	22
Life Delivers	22
The First Step in being a Nine Centered Being	23
One Step at a Time	23
Discovering Your Power	24
Form Principle Knowledge.....	24
Changing at the Deepest Possible Level.....	25

PHS: Primary Health System and the Awakening of the Body

Pre-Class Story

By the way, isn't this the most extraordinary weather? The normal daytime temperature on a day like today in April is about eight degrees Celsius. So, yesterday was a record, the hottest ever. And today is going to be another record. It's going to be over 25 degrees. If you need any proof that the world is really a little bit bizarre, we had snow in Ibiza this year. We don't get snow in Ibiza; it just doesn't happen. I'm a Canadian, and 25 degrees at the beginning of April, in Toronto, is a fairy tale. This is warmer than Miami right now. It's unbelievable.

I can tell you how bizarre the weather is in this city, many, many years ago I got married in Toronto in June, a June wedding. It was a private thing, just at our house. We had some guy who was going to come and marry us, and we had a couple of friends come over, we were going to have an evening dinner.

And it started to snow. It was a warning, right? I didn't pay any attention; I wasn't into my Spleen then. I did not realize this was bad. It snowed and it snowed. So, this guy—who was a Unitarian minister, they'll do any kind of wedding for anybody, any religion, anything—calls us up and says, "I'm stuck in traffic, and I don't know if I'm going to be able to make it."

Again, you don't learn these lessons, right? At midnight, our friends were exhausted. So we put them up in the guest room and they went to sleep. At some point, we went to sleep. And then the doorbell rings, it's two o'clock in the morning. I don't know whether I should be impressed with this guy or hate him. At two o'clock in the morning, he rings the doorbell, and he keeps ringing. He says, "A wedding is important." Right, but sleep, too. It's nice to

sleep as well. I tried to wake up my friend to be a witness, but there was no way.

His wife—you have never seen an uglier wedding party. Two women without makeup in the middle of the night, and me. So much for fate. Two and a half feet of snow. Can you imagine? In June. People were locked in for days. The guy couldn't leave, by the way. We had this guy for breakfast.

The Scientific Nature of Human Design

All right. Welcome to day two, in steamy Toronto. I've been doing this for 23 years, and in 23 years you just couldn't get to the bottom of the well because there's so much here in this knowledge. And over the last five or six years, fortunately, because the foundation of Design was established, gave me a chance to go into areas that needed to be explored, needed to be elaborated on in order to really understand the true scientific nature of what Human Design really is.

What I'm referring to is the various aspects of structure and substructure that are there in the design. What you're looking at in this graphic, is Maia Mechanics Advanced Imaging. Advanced Imaging was one of the biggest steps that I made in my process as a teacher.

The elaboration of the knowledge opened up so many areas of information that in fact, would not truly be grasped unless there was a way that they could be seen and integrated easily, because so much of what this knowledge is, is visual. What you're looking at in this graph is the most incredible keynoted way in which you can determine the differentiation of any human being. And it really is a remarkable area of study.
